**Smart Contracts** and **Blockchain** are revolutionary but... without a sound legal approach and full end to end support, could hide systemic risks and reinforce a trend toward massive data fragmentation and regulatory scrutiny.

- Digital management of contracts across all functions, organizations, and systems.
- Automate contract management processes end to end with smart legal contracts and blockchain interconnecting systems and data
- Continually extract intelligence from contracts, creating a real time contracting dashboard.
- Let you quickly spot risk and manage compliance and certification.

# The Future of Contracting

## Foundation for Smart Legal Contracts

# Adopting an end-to-end system of contractual automation

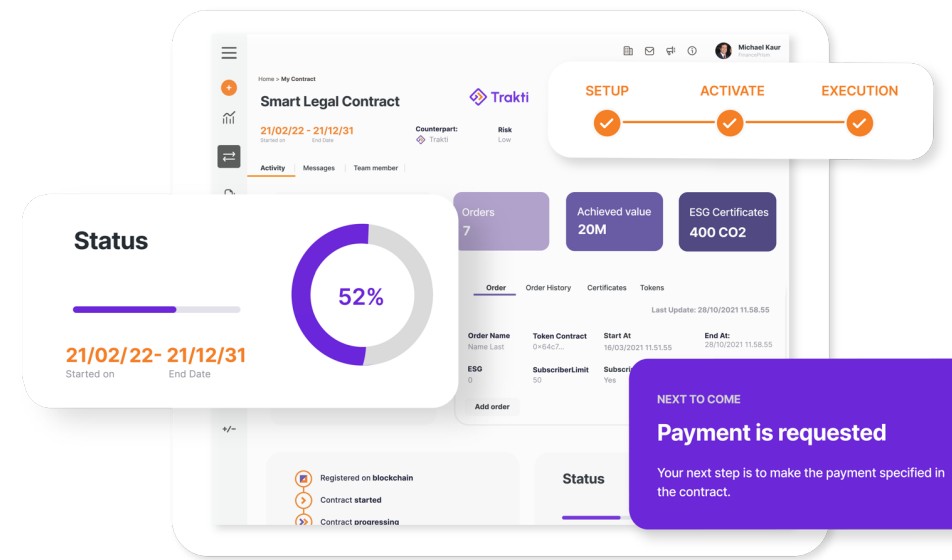

Improving the process of recruiting, onboarding, and signing candidates is increasingly facilitated by contract automation. By implementing the solution offered by Trakti you can use contract automation to digitally manage all documents end-to-end.

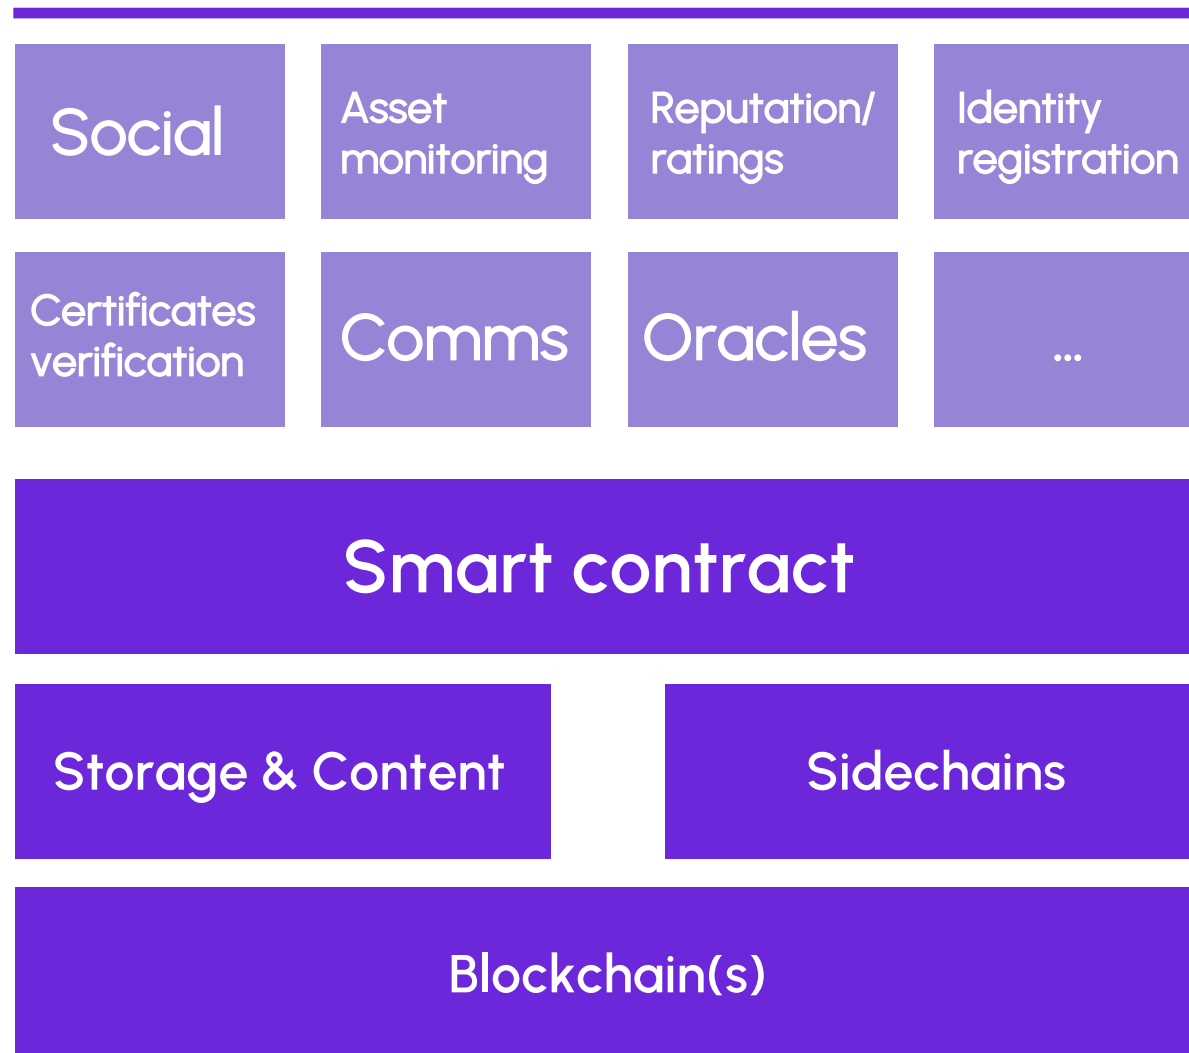

This means no printing and scanning and more signatures (using an electronic signature). Trakti's negotiation management allows greater visibility and centralization of information.

Service is improved by increasing onboarding efficiency.

# Applications

With over 35 features, our platform allows you to manage all phases of a contract, from start to finish, integrate payments, electronic and digital signature compliant with eIDAS and SPID (Infocert), record every single activity of the negotiation for certification and monitoring purposes and produce an audit report with one click.

# Clients achieved **benefits**

## Streamline Contracts

- 50% Time

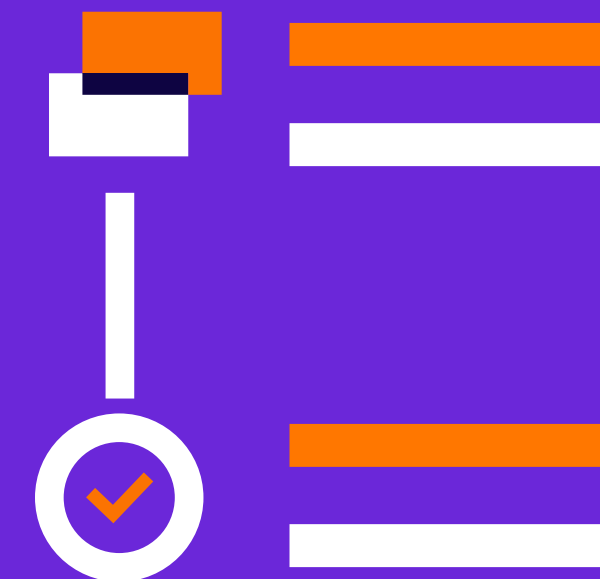

Increase self service Fast deal closing  
Faster contracting cycles  
FTEs optimization

## Reduce Ops. & Audit costs

- 30% Costs

Replacing old SW Improving operations  
Reducing paper waste

## Increase Compliance

Reduce Risks

Embedded legal mandates  
Integrated KYC\_AML  
Live risk monitoring  
Increase records trust  
On demand legal support

## Empower Analytics

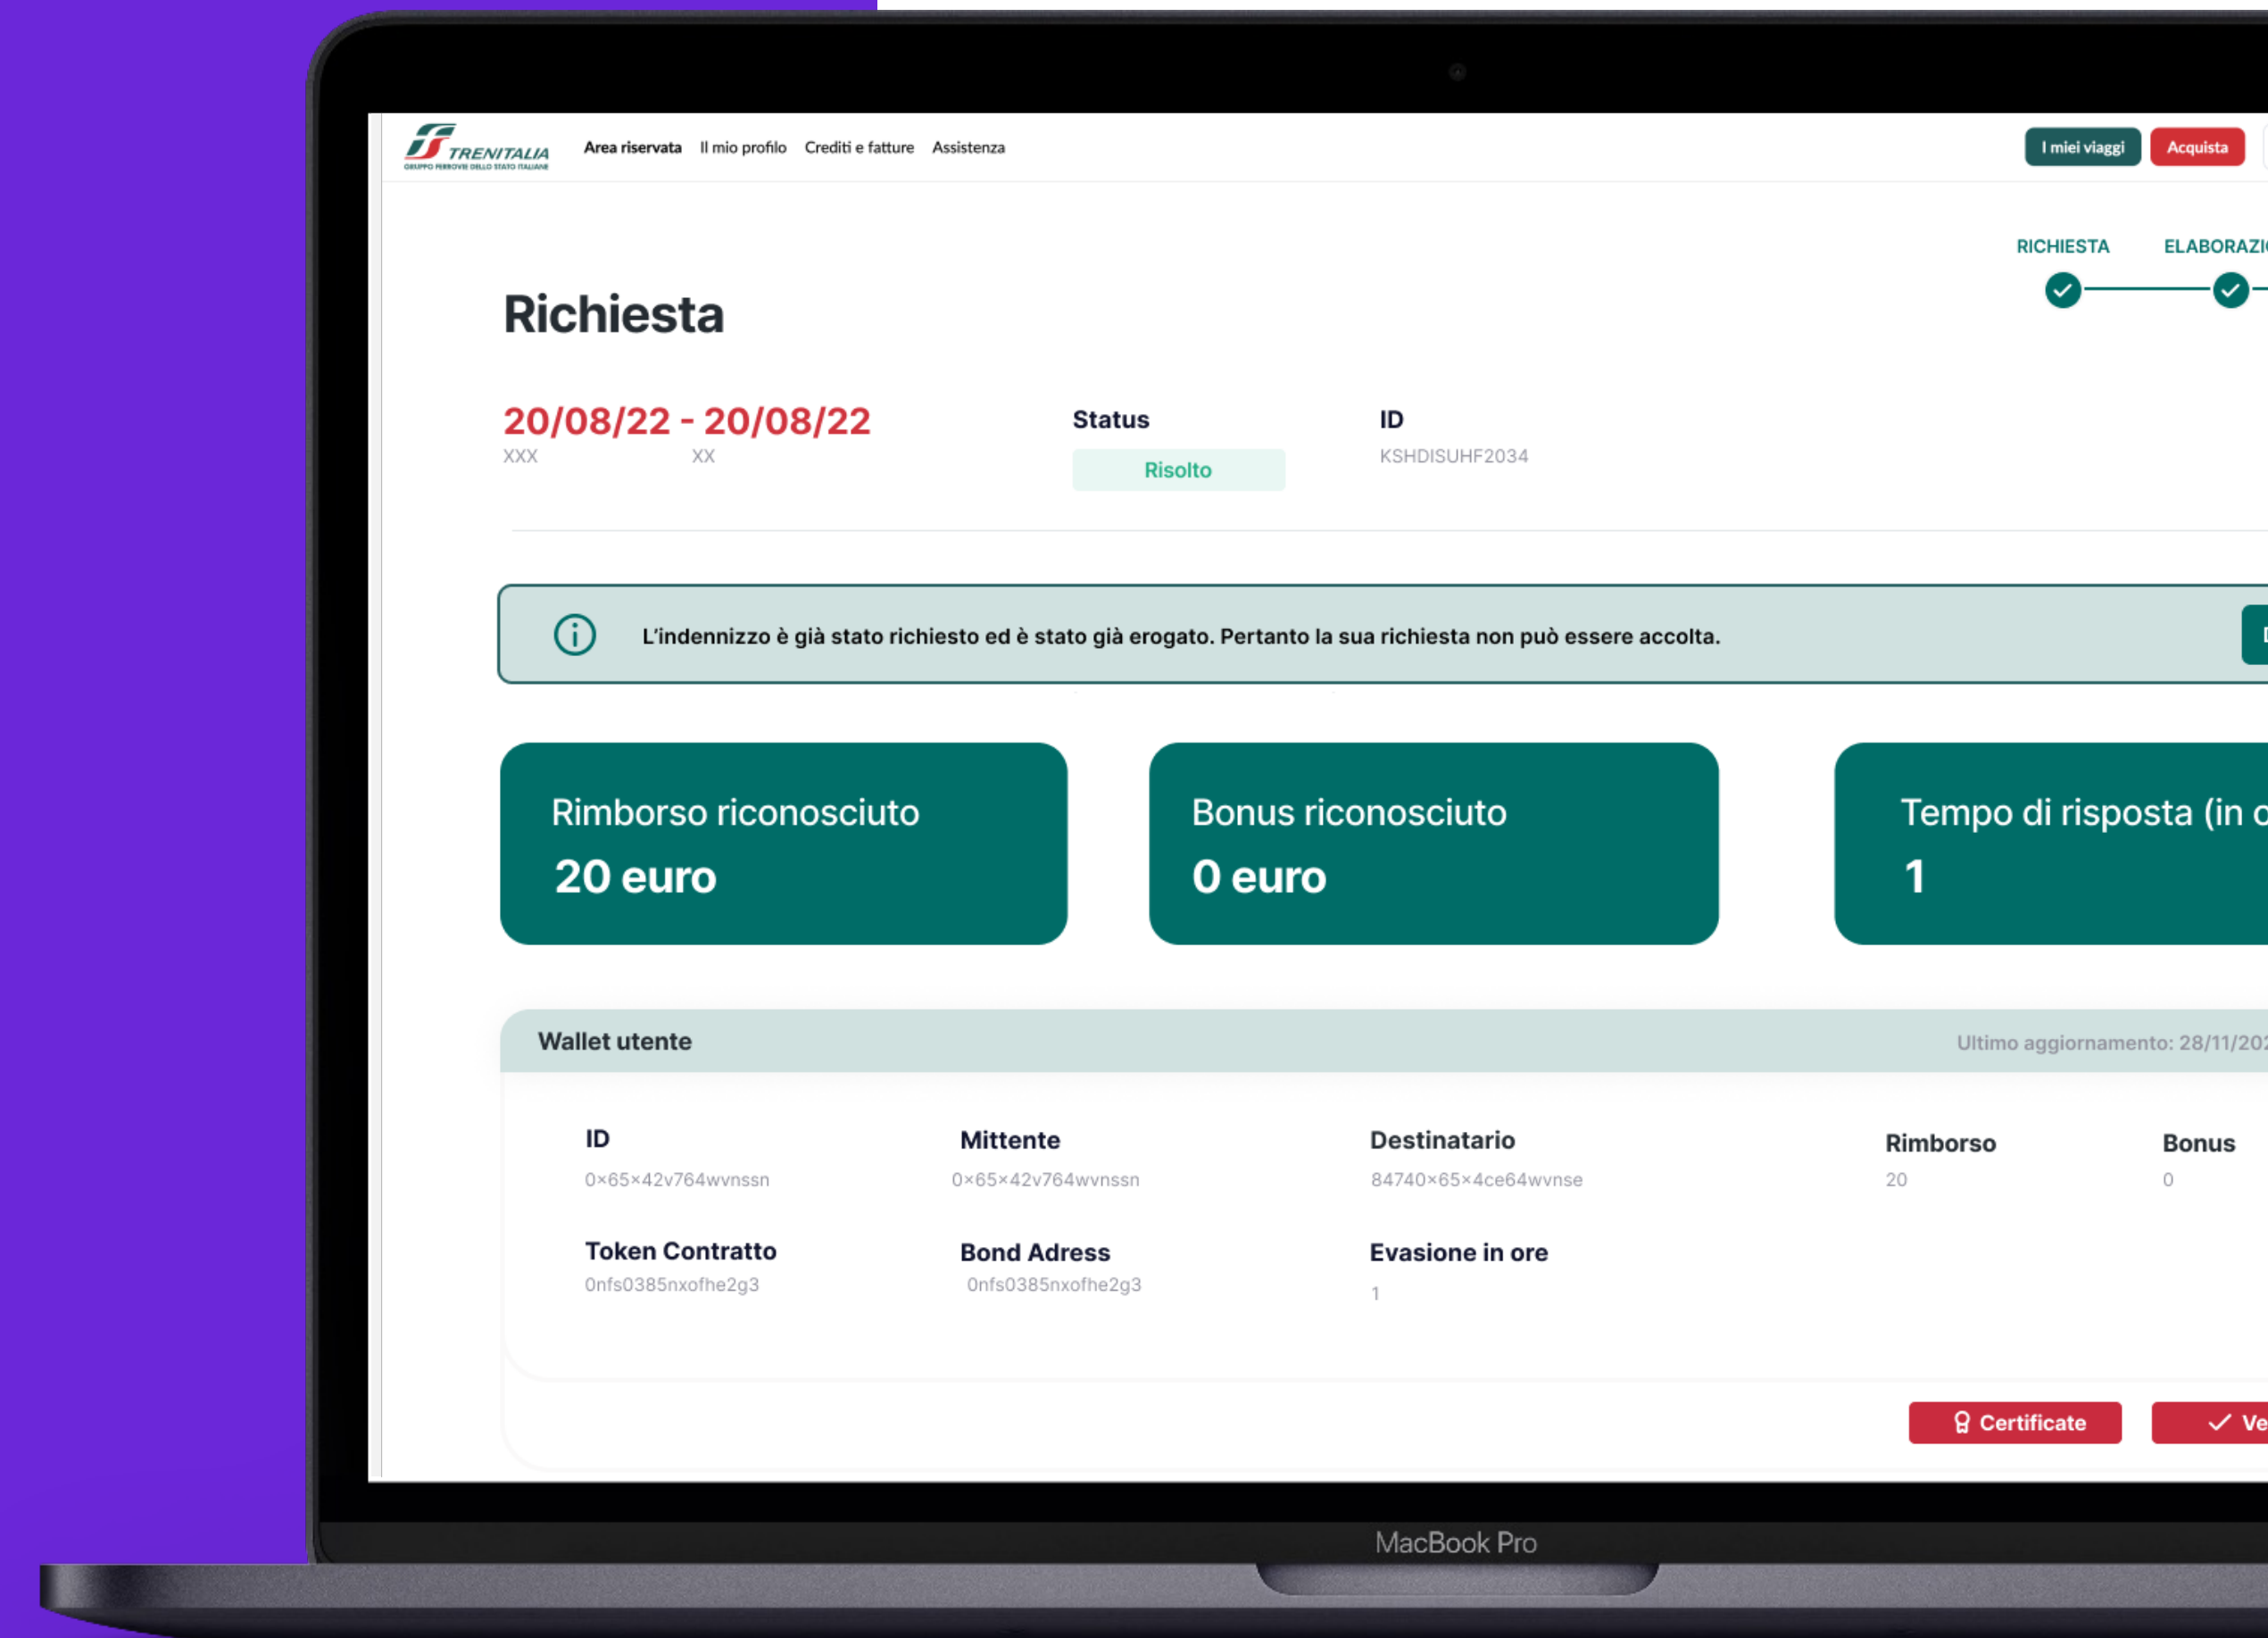

Enrich Contracts

Performance insights  
Real-time service monitoring  
Additional metrics like cycle times, deviations, statistics (expiry, renewal, pending, etc.)

We help our customers to  
Optimize the entire  
contract life cycle!

Creation of an end-to-end Smart Refund system and real-time verification of the status of the trip, the management of the refund of the ticket in case of delay, and activation of complaints by consumers.

# Smart Refund for

## Need

- ✓ Digitalization of manual after-sales phases: reimbursements, indemnities
- ✓ Connect internal systems: CRM, ERP, RFI train status, payments
- ✓ Real-time monitoring by the consumer of their practice
- ✓ Automatic Payments & Data Certification

## Solution

- ✓ Tracking of travel-related events: monitoring, certification and automation of refunds.
- ✓ Reduction of back office and after-sales management activities
- ✓ Improve the user experience with real-time control of your practice
- ✓ End-to-end flow (opening/closing of the journey) with event tracking

# Trakti
